

Don't be left in the cold next time the power goes out!

You Can't Prevent a Power Outage, But You Can Be Prepared

The next time a power outage leaves you in the dark and cold, you don't have to stumble around looking for a flashlight and batteries, or candles. The Carrier Automatic Home Standby Generator *automatically responds when it senses the loss of utility power*. It restores power to selected areas of your home in about thirty seconds, so you can continue living a relatively normal life.

Permanent, Long-Term Blackout Protection - This generator is permanently installed outside your home and powered by natural or LP gas. It's more effective and convenient than portable generators that only power a few extension cords, and it will operate indefinitely, as long as you have gas service. And it's totally automatic, so it responds to power outages any time, day or night whether you're home or not.

Enjoy the Comfort of Peace of Mind - With Carrier's Automatic Home Standby Generator, you can continue to operate the equipment vital to keeping your home safe, comfortable and inhabitable, including:

- * Heating and Cooling systems
- * Home office equipment
- * Computers
- * Sump Pumps
- * Televisions
- * Refrigerators/freezers
- * Phones
- * Lights
- * Well Pumps
- * Radios
