

**See what balanced humidification
can do for your home.
And your comfort.**

Your home needs to stay properly hydrated in order to maintain the health and comfort of those living in it.

Air that is too dry soaks up moisture from everything that it touches in your home — your woodwork, wood floors and furnishings — not to mention giving you dry skin, chapped lips, dry nasal passages and a jolt of static electricity.

No doubt about it, **dry air** can take a toll on your family and your home.

The Honeywell Steam Humidifier system can ensure that your home and family are getting just the right amount of moisture and no more.

MAINTENANCE

So what is the right amount of moisture for my home?

The optimal range for annual indoor relative humidity (RH) is 35 to 55 percent.* Unlike portable humidifiers that are only effective in the rooms they are located in, or other whole-house humidifiers that only deliver moisture when your heating equipment is running, the Honeywell Steam Humidifier works by producing its own steam independent of equipment operation, **maintaining the right balance** of humidity at all times.

Other humidifiers rely on moisture-filled pads that can be susceptible to bacteria growth in the water and the airstream. The Honeywell Steam Humidifier delivers the cleanest form of humidification.

In addition to keeping your home and family comfortable, the humidifier can help reduce heating bills. Because humidified air feels warmer, you'll be able to turn your thermostat down for savings.

The Honeywell Steam Humidifier System works independent of your heating and cooling system, so your home gets the moisture it needs exactly when it needs it.

Set It and Forget It

The the Honeywell Steam Humidifier also features a HumidiPRO™ digital humidistat, so you can simply set the system and forget it. HumidiPRO makes automatic adjustments when the weather changes to **reduce excess condensation** and frost on your windows. Or, you can manually adjust HumidiPRO to add a boost of moisture when you want it.

Out of Sight, Out of Mind

The Honeywell Steam Humidifier is installed out-of-sight by your heating and cooling professional into your home's central heating and cooling system. It is hooked up to a water supply where it automatically delivers its own steam humidification into your ductwork, which is then distributed throughout your home. You can also forget about having to fill clunky, portable units, because it automatically fills itself. And the water tank requires **minimal maintenance** — simply clean once a year with soap and water, and the rest of the time it cleans itself automatically.

* ASHRAE Standard

Is the Honeywell Steam Humidifier Right For You?

Highly recommended if those living in your home ever experience:

- Dry skin
- Dry nasal passages
- Dry or scratchy throat
- Chapped lips
- Unpleasant shocks from carpet or electronics
- Static cling

Or if your home has:

- Hardwood flooring
- Wood furnishings
- Paintings or artwork
- Musical instruments
- Uncomfortable temperatures in winter
- High utility bills

5-YEAR
WARRANTY
